

Enrocilina® 10%

Reg. S.A.G.A.R.P.A. Q-0524-073
FOR VETERINARY USE

Enrofloxacin

Injectable solution

Broad spectrum antimicrobial
in injectable solution

FORMULA

Each ml contains

Enrofloxacin	100 mg
Excipient q.s.	1 ml

Enrocilina® 10% is indicated in chronic and acute infectious processes.

Enrocilina® 10% is a broad spectrum antimicrobial.

Enrocilina® 10% is an effective treatment against resistant bacteria.

Enrocilina® 10% has a bactericidal effect.

Enrocilina® 10% eliminates bacteria in their multiplication and inactivity phases, resulting in greater effectiveness.

INDICATIONS

Enrocilina® 10% is a broad spectrum antimicrobial which has a fast bactericidal effect. Acts against gram-negative, gram-positive, mycoplasma and anaerobic bacteria in beef cattle and non-lactating cattle, sheep, goats and pigs. It is indicated for the treatment of local and systemic infections caused by sensitive microorganisms, especially against deep infections and intracellular pathogens. It is active against respiratory, intestinal, urinary and skin infections, as well as bacterial mastitis, meningoencephalitis, osteomyelitis and arthritis.

DOSE

Beef cattle and non-lactating cattle, sheep, goats and pigs: 1 ml per 40 kg of weight (equivalent to 2.5 mg of Enrofloxacin per Kg of weight).

Frequency: Every 24 hours for 3 consecutive days.

In intracellular bacterial problems, it is recommended to extend the treatment up to 5 days and double the recommended dose.

ROUTE OF ADMINISTRATION

Subcutaneous, intramuscular or intravenous.

Intrauterine route: by diluting 5 ml of **Enrocilina® 10%** in 80 ml of sterile physiological saline solution.

WARNINGS

Do not administer more than 10 ml per application site.

Do not administer in combination with chloramphenicol or tetracyclines.

Do not administer intramammary.

Withdrawal period

Do not consume the meat of the treated animals, nor its derivatives, until 28 days after the end of the treatment.

Store the product in a cool dry place, protected from light and at a temperature between 15 and 30°C.

Keep out of reach of children or pets.

Consult your veterinarian.

Its purchase requires a medical prescription.

PRESENTATION

Bottle with 25 and 250 ml.
